

To Our Valued Customers and Partners,

As the global, national, and local reactions to the Novel Coronavirus (COVID-19) continues to be in flux, we at GSM Industrial want our customers and partners to be aware of our company's response.

We take our role in your company's success seriously, and we are committed to delivering the quality fabrication and manufacturing you've come to expect from us, even in the face of a national crisis.

As of Monday, 3/30/2020, GSM Industrial is open, with our shop and field operations running at a limited capacity.

We are working hard to keep up with the demands of our customers who are continuing to run as essential, Life Sustaining businesses. We are asking that customers provide a letter to confirm their status and we are addressing each project on a case by case basis. Our shipping and receiving department is running and delivering projects as carriers are available and customers can receive them. We are also continuing to offer field service work to life sustaining businesses in PA and essential operations out of state.

Finally, GSM Industrial is working to protect our best assets: our people and the communities in which we work. We are following COVID-19 developments and requiring employees to follow the standards set forth by the CDC. Our entire office staff is continuing to work remotely so our office is closed to visitors who do not have an appointment.

PLEASE CALL MY MOBILE PHONE AT 717.575.1890 TO ACCESS THE BUILDING

Sincerely,

Brian Dombach,
President, GSM Industrial
